

PROJECT EXPLANATION

Name of the project: covid2.0

IDEA OF THE PROJECT:

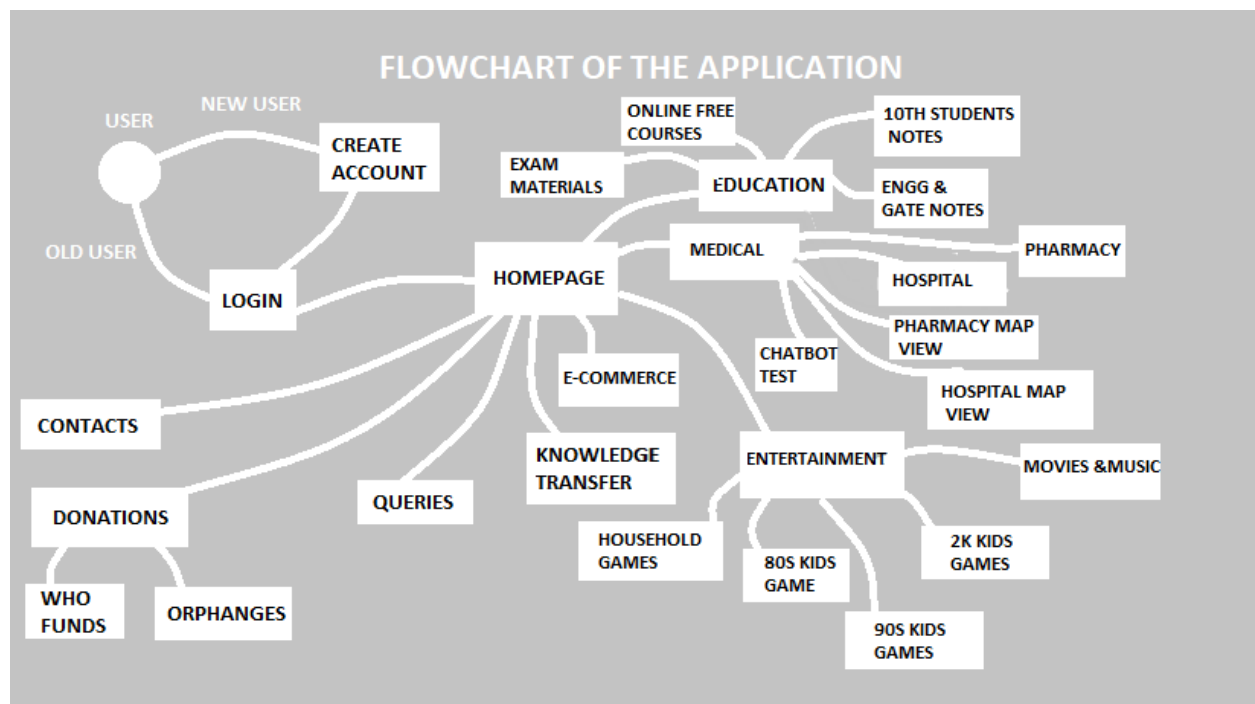

- Covid-19 is the recent most deadliest virus that causes several death across the world.
- Here we have the idea based on this virus prevention ,safety measures etc
- Most of the peoples are not aware of the covid -19 and its impact , so in order to create awareness and do know that they are affected by the virus.
- Our idea is to develop an android application to face the current situation problem and also our app contains chatbot which allows user to find the symptoms and steps he/she must do before or after affected by virus.

BRIEF EXPLANATION OF IDEA:

- ▶ The application is mainly for updating people about covid-19 and creating awareness. It contains online nearest shop purchasing facilities, medical facilities.
- ▶ Our government many motto is not to go out and stay home ,so we added a this features so they can call and place their orders and free delivery or paid delivery will be available in those shops.
- ▶ Apart from this , the educational help is also done. The students studying 10th and college student may be in need of the study materials .so connecting and give them the right notes will also an additional features in this application.
- ▶ The webpage is mainly for updating people about covid-19 and creating awareness. It contains online nearest shop purchasing facilities, medical facilities.
- ▶ Our government many motto is not to go out and stay home ,so we added a this features so they can call and place their orders and free delivery or paid delivery will be available in those shops.
- ▶ Apart from this , the educational help is also done. The students studying 10th and college student may be in need of the study materials .so connecting and give them the right notes will also an additional features in this webpage.
- ▶ Next thing is that recent updates and world wide covid-19 updates will be given .various health and medical tips also given.

- ▶ User can also provides help by offering food and fund to the needy . they can know the details and give them the needs. User can post their needs or others needs in this application and send this and collect the fund
- ▶ This also contains PM or respective state CM funding links too. Users can also give their own suggestion and medical doctors can give suggestion in the tips section too.

FLOWCHART OF THE APPLICATION

APP INTERFACE:
